Inclusive Employment
for People with Disabilities
推动残障人士融合就业

About Us

There are an estimated **85 million** people with disabilities living in China. Their unemployment rates are high, and they are mostly isolated from the mainstream society. Striving to solve this issue, the Inclusion Group was established based on the German “Lebenshilfe” model. Our objective is to create a sustainable framework that uses employment to help people with disabilities to be included into our society.

Inclusion Factory is a social enterprise providing employment opportunities to People with Disabilities

Inclusion Advisory is a service supporting companies hiring People with Disabilities

Social Inclusion Academy is a program using education as a tool for social awareness, vocational rehabilitation, and inclusion

Become our partner, It's mutually beneficial

Our sustained development is inseparable from the help and support of our many partners. Some enterprises outsource all their orders to us directly, some provide professional services to us, like brand design and legal services. Some provide us with material sponsorship, like our staff lunch, uniform, etc. while others supply us with project funding, like shuttle buses and staff travels. As long as an enterprise is happy to do good, they will find an effective channel that suits them.

We are extremely grateful for all the partners that have been with us along the way. This is why we do everything we can to give back to them.

Your Support to us will bring Value to your Company

Create jobs

Support us to improve our sustainable employment model so that we can hire more people with disabilities

Support achieving the Sustainable Development Goals

If enterprises want to succeed in the long run, we need to jointly aim at accomplishing the Sustainable Development Goals

Expand your Brand Reach

We will circulate the cooperation between you and us, so that people will learn about your story and how you are helping our society

Work with you

Promoting the UN Sustainable Development Goals

The Sustainable Development Goals (SDGs) unanimously adopted by 193 member states in 2015 represent United Nations' largest program guiding global development between 2015 and 2030. These 17 goals provide us with a guidance how to solve challenges that our world has been facing.

While the SDGs need business, this dependence is entirely mutual. Businesses cannot thrive in societies that fail, and long-term success hinges on the SDGs being realized.

So the SDGs need business leadership and action.

Promoting Common Prosperity

A Social Responsibilities Focal Point for Enterprises

The Fifth Plenary Session of the 19th Central Committee of the Communist Party emphasized that eradicating poverty, improving people's livelihood, and achieving common prosperity are the essential requirements of socialism. It is necessary to construct a basic system arrangement for the coordination of primary distribution, secondary distribution, and tertiary distribution. So as to promote the holistic development of the people and move everyone firmly towards the goal of common prosperity.

Promoting common prosperity should become a conscious practice for enterprises, as part of their actions to actively fulfill their social responsibilities. Participating in the national strategy of promoting common prosperity is an important focal point for private enterprises to actively fulfill their social responsibilities.
